

Recent Changes to Pre-Scoping Module

“Hand-Off” Functionality

- Enables one organization to create and edit an application and “hand-off” editing/ submission capability to another.
- Example - MPO/PDC staff creates and begins editing application and then switches the Organization to a member Locality to finish editing and/or submit the pre-scoping application.

Feature Changes*

- Drop “Roundabout(s)” from “Innovative Intersection(s)/ Roundabout(s)” so it now reads “Innovative Intersection(s)”
- Add “Innovative Intersection” feature (In Highway Improvements section)
- Change “Road Diet” to “Road Reconfiguration”

General Pearl Changes*

- Rename “Project Short Description” to “Project Description”

Mapping / Location Changes**

- Updated ESRI Version
- Added Existing Funded Projects Layer
- New Selected Segment Slice tool

Validation tool text changes*

- Under “location”, changed the term from “Polygon Extents” to “Project Linework Extents” and the text under it to “Project Linework includes all areas with proposed improvement(s) and project has been georeferenced via the Roads and Highways Tool”
- Removed “required planning/safety study” from the validation tool. This question is now covered by the “warnings” question/section.

Delivery/Funding*

- FY2025 is first year of inflation / escalation applied to estimates

**also enhanced in SMART SCALE Pre-Application and/or Full Application*

***SMART SCALE Pre-Application and Full Application has additional mapping / location enhancements not required at the time of pre-scoping application creation*
